

D 1.6.7 Online webpage with public access to the project deliverables

To ensure transparency and long-term impact, the MORE4Sustainability project has created a dedicated online webpage providing public access to all project deliverables. On this page, stakeholders can freely consult and download materials such as the Sustainable Asset Management Roadmap, training resources, and benchmark insights. The deliverables are published under a Creative Commons licence (CC BY-NC-ND 4.0), making them accessible for use across industries and countries while safeguarding the integrity of the content.

Explore the deliverables here: <https://more4sustainability.nweurope.eu/downloads>
